

$\lambda = (3, 3, 2, 1)$, $\beta = (8, 7, 5, 3, 1, 0)$, $c = 8$ --- self-complementary, $w = 3$ odd: the character vanishes

$\lambda = (3, 3, 2, 2)$, $\beta = (8, 7, 5, 4, 1, 0)$, $c = 8$ --- one box away: no pairing, and it does not
