

$\lambda = (3, 3, 2, 1), \beta = (8, 7, 5, 3, 1, 0), c = 8$ --- autocomplementaria, $w = 3$ impar: el carácter se anula

$\lambda = (3, 3, 2, 2), \beta = (8, 7, 5, 4, 1, 0), c = 8$ --- a una casilla: sin emparejamiento, y no se anula

● β_j par
 ● β_j impar
 — $x \mapsto c - x$, cayendo en β
 ---- cayendo fuera de β
