

$$v_p = 2 \dim - 1 - W_1: \text{one plane, two rings}$$

(a) the measured cells and the plane

(b) edge-on: the plane becomes a line

- real SU(n): 173 cells, 13 sites
- ▲ shadow GL(n): 217 cells, 6 sites
- ✕ ladder zone, $W_1 = 0$ (19)
- other cells off the hypothesis (8)
